About

The People's Health Movement (PHM) is a global movement that has its roots deep in the grassroots people's movements and owes its genesis to many health networks and activists who have been concerned by the growing inequities in health over the last 25 years. The PHM calls for a revitalization of the principles of the Alma-Ata Declaration, which promised Health for All by the year 2000, and a complete revision of international and domestic policy that has shown to negatively impact health status and systems. The People's Health Movement is coordinated by a global secretariat and is supported by a steering council.
